HYGIENISATOR

The Hygienisator

The plug-and-play solution
for excess digestate

HYGIENISATOR

Plug-and-play solution

Adding value

Hygienisation kills the harmful and dangerous bacteria in digestate. As an indicator of its process performance, The Hygienisator is able to constantly achieve a >5 log reduction of *Enterococcus faecalis*.

Technical benefits

The Hygienisator works in a continuous process and only uses recycled heat from the biodigesters' cogenerator. This makes the process very sustainable and limits energy costs.

Regulation

The Hygienisator complies with the latest European legislation for hygiene (EHEDG) and safety (CE). The clean digestate can be freely exported throughout the EU ((EG) nr. 1774/2002).

Specifications

- Always tailor made to specific needs
- Plug-and-play solution
- >5 log reduction of *Enterococcus faecalis*
- CE and EHEDG certified
- Dimensions 12.4 x 2.5 x 5.8 m (l x w x h)
- Typical capacity of 50 – 150 ton / day
